

CHAPTER 25

IMPLEMENTATION

Overview 2500

The Implementation Element describes how the policies and actions in the Comprehensive Plan should be carried out. The Element provides recommendations on improving the long-range planning process, enhancing links between the Comprehensive Plan and the Capital Improvement Plan, reporting on Comprehensive Plan progress, and updating and amending the Comprehensive Plan in the future. It also identifies recommended Comprehensive Plan actions with links to Zoning regulations, to highlight the need for changes to ensure that “zoning is not inconsistent with the Comprehensive Plan” as required by the DC Code. 2500.1

This Element is divided into three sections:

- Administration of the Planning Process;
- Strengthening Linkages to Capital Programming and Zoning; and
- Monitoring, Evaluating, and Updating the Comprehensive Plan 2500.2

The Implementation Element also includes an “Action Planning” Table (Table 25.1) summarizing all actions in the Comprehensive Plan. All of the actions listed in Table 25.1 are excerpted from Chapters 1-24 of the Plan and the reader is advised to consult the relevant chapter for more information and additional context for each action listed. 2500.3

IM-1.0 Administration of the Planning Process 2501

This section of the Implementation Element addresses the manner in which land use planning policies are interpreted and applied on a day-to-day basis. This includes the development review, small area planning, zoning, long-range planning, and community involvement activities that are used to carry out Comprehensive Plan policies. These policies effectively define “standard operating procedures” for planning administration in the District of Columbia. 2501.1

IM-1.1 Development Review 2502

The development review process provides one of the most effective means of carrying out Comprehensive Plan policies. Projects requiring review by staff, the Board of Zoning Adjustment, and the Zoning Commission may be tied to findings of consistency with the Comprehensive Plan, or at least to evaluations that consider relevant Comprehensive Plan policies. Development review also provides a means of evaluating the impacts of major projects on public services and the natural environment, and assessing the compatibility of proposed design with adjacent uses and neighborhood character. The latter assessment is particularly important in historic districts, where review by the Historic Preservation Review Board also may be required. 2502.1

Of course, not all projects are subject to review. Much of the city’s development is permitted as a matter-of-right under existing zoning, affording few opportunities for the Office of Planning to determine Comprehensive Plan consistency. In the future, methods of increasing the scrutiny of matter-of-right projects may be needed, particularly with respect to urban design and environmental impacts. This could include adjustments to the thresholds for projects requiring “Large Tract Review”, implementation of a

IMPLEMENTATION

Site Plan Review process, changes to the city's Environmental Impact Screening Forms, and additional standards to ensure that development sufficiently mitigates its effects on traffic, parking, infrastructure, and public service needs. 2502.2

Review and modifications to the Planned Unit Development (PUD) process and regulations are also needed. PUDs were originally conceived as a way to develop large tracts of land more creatively than was allowed by matter-of-right zoning. Creative design has been further incentivized through the granting of additional building height and density by the Zoning Commission in exchange for public benefits such as affordable housing and open space. The Zoning Regulations establish minimum lot area standards for PUDs, ranging from two acres in low- and moderate-density residential districts to 15,000 square feet in high-density and commercial zoning districts, with provisions for reductions to these standards included in the Regulations. Public benefits are generally provided on-site, but may also be provided in the surrounding area, subject to specific provisions set forth by zoning. 2502.3

While this process allows for significant public input and often results in superior design and amenities, it has been criticized in some parts of the city. Throughout the Comprehensive Plan revision process, concerns were expressed about the location and extent of public benefit amenities, the level of additional density that may be granted, and a perceived lack of predictability. As the District sets out to revise its Zoning Regulations, careful evaluation of the PUD thresholds, standards, and waiver conditions is recommended. 2502.4

Policy IM-1.1.1: Mitigation of Development Impacts

To the greatest extent feasible, use the development review process to ensure that impacts on neighborhood stability, traffic, parking and environmental quality are assessed and adequately mitigated. 2502.5

Policy IM-1.1.2: Review of Development in Surrounding Communities

Increase the District's participation in the review of development projects located in neighboring jurisdictions along the District's boundaries in order to promote land use compatibility and more effectively address traffic and parking issues. 2502.6

Policy IM-1.1.3: Relating Development to Infrastructure Capacity

Ensure that development does not exceed the capacity of infrastructure. Land use decisions should balance the need to accommodate growth and development with available transportation capacity, including transit and other travel modes as well as streets and highways, and the availability of water, sewer, drainage, solid waste, and other public services. 2502.7

Policy IM-1.1.4: Incentives for Achieving Goals and Policies

Allow the use of zoning incentives such as increased height and density in appropriate locations as a tool for achieving Comprehensive Plan goals and policies. 2502.8

Policy IM-1.1.5: Development Approvals and the Comprehensive Plan

To the extent they are relevant, consider the goals and policies of the District Elements in the approval of planned unit developments, variances, campus plans, special exceptions, large tract reviews, and other projects requiring review. 2502.9

Policy IM-1.1.6: Studies Preceding Zoning Case Approvals

Ensure that zoning case approvals such as Planned Unit Developments (PUDs) utilize: (1) transportation and infrastructure studies and recommended conditions of approval to mitigate potential impacts; (2) agreements for financing any necessary improvements, including public and private responsibilities; (3)

IMPLEMENTATION

agreements to comply with “first source employment” requirements and other regulations that ensure public benefits to District residents. 2502.10

Policy IM-1.1.7: Housing as a PUD Amenity

Consider the provision of on-site housing for low and moderate income households, seniors, and persons with special needs as an important amenity in Planned Unit Developments. 2502.11

Policy IM-1.1.8: Location of PUD Amenities

Require that a substantial part of the amenities proposed in Planned Unit Developments (PUDs) shall accrue to the community in which the PUD would have an impact. 2502.12

Action IM-1.1-A: PUD Regulations

Complete an evaluation of the District’s Planned Unit Development (PUD) regulations and procedures, including a “Best Practices” assessment of PUD practices in other large cities. The evaluation should consider minimum size thresholds, appropriate allowances for bonus height and density, the types of public benefits that may be provided, and review and approval procedures. The evaluation should also consider much stricter limitations on the extension of PUD approvals. 2502.13

Action IM-1.1-B: Large Tract Review

Complete an evaluation of the District’s Large Tract Review procedures, including a “Best Practices” assessment of large tract procedures in other large cities. The evaluation should determine if the existing threshold of 50,000 square feet for commercial projects and three acres for residential projects is appropriate, and should include provisions to preclude projects from being broken into phases as a way to circumvent the review process. 2502.14

IM-1.2 Small Area Planning 2503

Small Area Plans cover defined geographic areas that require more focused direction than can be provided by the Comprehensive Plan. The intent of such plans is to guide long-range development, stabilize and improve neighborhoods, achieve citywide goals, and attain economic and community benefits. The Comprehensive Plan Area Elements identify where Small Area Plans should be prepared, with an emphasis on the Land Use Change Areas, Enhancement Areas, and business districts shown on the Comprehensive Plan’s Generalized Policies Map. As these Small Area Plans are completed, future amendments to the Comprehensive Plan should identify subsequent generations of small area plans. ANC and public involvement in the development of Small Area Plans is desired and expected. 2503.1

Policy IM-1.2.1: Small Area Plans

Prepare Small Area Plans and other planning studies for parts of the city where detailed direction or standards are needed to guide land use, transportation, urban design, and other future physical planning decisions. The focus should be on areas that offer opportunities for new residential, commercial, and mixed use development, or areas with problems or characteristics requiring place-specific planning actions. Use the Comprehensive Plan Area Elements, the Generalized Policies Map, and land use monitoring activities to identify areas in the city where such plans are needed. Citizens shall have the right to petition or suggest small area plans to be proposed by the Mayor. 2503.2

Policy IM-1.2.2: Protocol for Small Area Plans

Ensure that Small Area Plans take a form appropriate to the needs of the community and reflect citywide needs, District and neighborhood economic development policies and priorities, market conditions, implementation requirements, competing demands, available staffing resources and time, and available funding. Such plans should address such topics as neighborhood revitalization and conservation needs and strategies, aesthetic and public space improvements, circulation improvements and transportation

management, capital improvement requirements and financing strategies, the need for zoning changes or special zoning requirements, and other implementation techniques necessary to achieve plan objectives. Small area plans should be adopted by the Council and used to supplement the Comprehensive Plan. If necessary, Comprehensive Plan amendments should be introduced to ensure internal consistency for the areas involved. 2503.3

Please consult the Area Elements of the Comprehensive Plan for actions relating to the locations of future Small Area Plans.

IM-1.3 Zoning Regulations and Consistency 2504

The importance of zoning as a tool for implementing the Comprehensive Plan, particularly the Future Land Use Map, is discussed in several places in the Comprehensive Plan. The Home Rule Charter requires that zoning “shall not be inconsistent” with the Comprehensive Plan. Consequently, revisions to the Comprehensive Plan should be followed by revisions to the Zone Map, with an emphasis on removing clear inconsistencies. 2504.1

However, the zoning impact of the District Elements of the Comprehensive Plan is broad, and is not limited to areas where Comprehensive Plan/ Zone Map inconsistencies are present. Additional zoning map amendments may be needed to achieve neighborhood revitalization or conservation goals. The Zoning Regulations themselves need substantial revision and reorganization, ranging from new definitions to updated development and design standards, and even new zones. A major revision to the Zoning Regulations is planned for 2007-2009. Action items throughout the Comprehensive Plan have been listed for consideration during this effort, eventually enabling zoning to work more effectively as a Comprehensive Plan implementation tool. Table 25-1 highlights all zoning-related actions that are included in the Comprehensive Plan. 2504.2

Policy IM-1.3.1: Updating Land Use Controls

Regularly review and update the District’s land use controls and building codes to eliminate obsolete regulations and develop new regulations that address emerging issues, land uses, building types, and technologies. 2504.3

Policy IM-1.3.2: Zone Map Consistency

Consistent with the Home Rule Charter, ensure that the Zone Map is not inconsistent with the Comprehensive Plan Future Land Use Map. Make appropriate revisions to the Zone Map to improve its alignment with the Future Land Use Map and to eliminate clear inconsistencies. 2504.4

Policy IM-1.3.3: Consultation of Comprehensive Plan in Zoning Decisions

Require the Board of Zoning Adjustment, the Zoning Commission, the Zoning Administrator, and other District agencies or decision-making bodies regulating land use to look to the District Elements of the Comprehensive Plan and its accompanying Maps. Decisions on requests for rezoning shall be guided by the Future Land Use Map read in conjunction with the text of the Plan (Citywide and Area Elements) as well as Small Area Plans pertaining to the area proposed for rezoning. 2504.5

Policy IM-1.3.4: Interpretation of the District Elements

Recognize the overlapping nature of the Comprehensive Plan elements as they are interpreted and applied. An element may be tempered by one or more of the other elements. As noted at Section 300.2, since the Land Use Element integrates the policies of all other District elements, it should be given greater weight than the other elements.

IMPLEMENTATION

Policy IM-1.3.5: District Government Compliance

Ensure continued compliance by the government of the District of Columbia with the provisions and standards of its building and zoning regulations in all parts of the city.

Action IM-1.3-A: Zone Map Revision

Undertake a comprehensive revision to the District's Zone Map to eliminate inconsistencies between zoning and the Comprehensive Plan Future Land Use Map and other Comprehensive Plan Maps, including those showing historic districts. 2504.6

Action IM-1.3-B: Comprehensive Plan / Zoning Correspondence Table

Prepare and publish general guidelines which indicate which zone districts are "clearly consistent", "potentially consistent", and "clearly inconsistent" with each Comprehensive Plan Land Use Category. 2504.7

Action IM-1.3-C: Review of Definitions

Review the definitions used in planning, zoning, building, and housing codes to determine if changes are needed to establish consistency between District agencies. 2504.8

Action IM-1.3-D: Adoption of Future Land Use Map and Policy Map

Adopt the Future Land Use Map and Policy Map by "Act." Any inconsistencies in land use map designations between the illustration on the map and the textual description of the map designation that is contained in the adopted Comprehensive Plan legislation shall be resolved in favor of the text. 2504.9

IM-1.4 Long-Range Planning 2505

A healthy long-range planning function is essential to implement and maintain the Comprehensive Plan, monitor its effectiveness, and collect and analyze data to guide land use decisions. Other sections of the Comprehensive Plan speak to the importance of using long-range planning to guide the capital improvement process, public facilities plans, and transportation, housing, and economic development efforts. Good plans must be based on good data; their success should be measurable through quantifiable benchmarks. Part of the function of long-range planning is to ensure that such benchmarks are realistic and are based on accurate sources, research, and analysis. 2505.1

Another key function of long-range planning is to advocate on the District's behalf at the regional level. Successful implementation of the Comprehensive Plan will require additional collaboration with adjacent state, county, and city governments; and additional regional planning initiatives. The District must be more than a passive bystander in these initiatives. It should lead the way in discussions about regional housing, transportation, social, and environmental issues. It should advocate for greater equity at the regional level, stronger measures to balance jobs and housing across the region, and transit improvements which improve regional mobility, environmental quality and reduce urban sprawl. 2505.2

Policy IM-1.4.1: Long-Range Planning Program

Using the recommendations including in Section IM-3.0 of this Comprehensive Plan, establish an ongoing planning process that provides for updating and amending the Comprehensive Plan, periodic progress reports, and collection and dissemination of long-range planning data. 2505.3

Policy IM-1.4.2: Monitoring Neighborhood Trends

Monitor social, economic, community, and real estate trends that might require land use actions or policy modifications. Ensure that current, reliable data is incorporated in the city's land use planning efforts and that such data is consistently used across District agencies. 2505.4

Policy IM-1.4.3: Regional Planning

Actively participate in regional land use planning initiatives, and recognize the link between these initiatives and broader District goals relating to housing, transportation, economic growth, social equity, and environmental quality. Encourage jurisdictions across the region to do their part to meet regional housing demand for persons of all incomes, accommodate special needs populations, contribute to transportation improvements, and make land use and transportation decisions which support “smart growth”. 2505.5

Action IM-1.4-A: Progress Reports

At least once every two years, prepare a Comprehensive Plan Progress Report for the Council that documents the progress being made on implementation of the District Elements. 2505.6

IM-1.5 Public Input 2507

The District of Columbia is committed to public involvement in local government affairs, particularly those relating to land use decisions. The District has one of the most extensive networks of citizen and civic organizations, neighborhood organizations, advocacy groups and special interest groups in the country. Its 37 Advisory Neighborhood Commissions (ANCs) provide a unique forum for seeking local input and expressing priorities on a range of land use issues. The Zoning Commission, Board of Zoning Adjustment, and the Council itself provide formalized opportunities for public discourse on land use matters. The advent of the Internet, e-mail, streaming video, and other technologies have made information instantly accessible to thousands of residents, enabling unprecedented levels of participation in community meetings, summits, and forums. 2507.1

There is presently considerable interest in expanding input even further through the creation of a city Planning Commission. A 2003 Assessment of the Comprehensive Plan concluded that the merits of a Planning Commission should be evaluated, in part to improve Comprehensive Plan implementation and accountability. This dialogue has continued to evolve over the past three years. Several options for the Commission’s composition and responsibilities have been proposed; these will be given further consideration after the Comprehensive Plan is adopted. 2507.2

Policy IM-1.5.1: Involvement of Advisory Neighborhood Commissions

Include the Advisory Neighborhood Commissions and area residents in the review of development to assist the District in responding to resident concerns. Consistent with the statutory requirements of the DC Code, feedback from the ANCs should be given “great weight” as land use recommendations and decisions are made. 2507.3

Policy IM-1.5.2: Promoting Community Involvement

Encourage the community to take a more proactive role in planning and development review, and to be involved in Comprehensive Plan development, amendment, and implementation. A variety of means should be used to secure community input, including advisory and technical committees, community workshops, review of draft texts, public forums and hearings, and other means of discussion and communication. 2507.4

Policy IM-1.5.3: Faith Institutions

Recognize the importance of faith institutions to neighborhood life in the District, including their role as neighborhood centers, social service providers, and community anchors. Work collaboratively with local faith institutions in neighborhood planning and development initiatives, both to address community needs and to reach residents who might not otherwise participate in local planning initiatives. 2507.5

Policy IM-1.5.4: Transparency in Decision-Making

Strongly encourage transparent decision making in all land use and development matters, making information available and accessible to residents and maintaining open lines of communication with the public as plans are developed. 2507.6

Policy IM-1.5.5: Electronic Media

Enhance communication between residents, organizations, and the District by providing access to information through electronic media and other methods. 2507.7

Action IM-1.5-A: Planning Publications

Prepare a set of easy-to-understand written and electronic guides to help residents navigate the planning and building processes, comprehend land use planning and zoning regulations, and follow the standards, procedures, and expectations used in local planning activities. 2507.8

Action IM-1.5-B: Planning Commission Feasibility Study

Consistent with the recommendations of the Comprehensive Plan Assessment of 2003, conduct a Mayorally-commissioned study of the feasibility of creating a Planning Commission in the District of Columbia. The report shall be prepared by outside parties and submitted to the Mayor, the Council, and the public within 120 days of the effective date of the Comprehensive Plan Amendment Act of 2006. . The report shall summarize potential models for such a Commission, including its composition, roles, responsibilities, authority, staffing, and relationship to the City Council and other city commissions. 2507.9

IM-2.0 Strengthening the Linkages to Capital Programming and Zoning 2508

This section addresses the need to strengthen the links between the Comprehensive Plan and the capital improvement and zoning processes. 2508.1

IM-2.1 Link to Capital Improvement Planning 2509

A capital improvement plan (CIP) is a multi-year plan identifying capital projects to be funded during the planning period. Capital improvement planning provides one of the most important means to establish the Comprehensive Plan as the guiding document for future public investments. The CIP provides government with a process for the planning and budgeting of capital needs. It answers such questions as what to buy, build, or repair and when to buy or build it. The basic function of a CIP is to provide a formal mechanism for decision-making, a link to the Comprehensive Plan, and a financial management tool for setting priorities for capital projects. 2509.1

Most communities prepare a five- or six-year CIP. In general, only projects over a certain cost threshold and with a useful life of many years qualify for CIP funding. The CIP is generally organized around major program categories such as Parks and Recreation; Transportation Initiatives; Housing and Community Development; Public Facilities; Infrastructure, etc. 2509.2

The CIP identifies each proposed capital project to be undertaken, the year the improvements or assets will be acquired or the project started, the amount of funds to be expended each year, and the way the expenditure will be funded. A CIP is not a static document. It is reviewed and updated on a regular basis (commonly on a yearly or two-year cycle) to reflect changing priorities, unexpected events, and new opportunities. The CIP includes investments in the repair and rehabilitation of existing infrastructure and facilities as well as the construction of new infrastructure and facilities. It can include capital items such as buildings, utility systems, roadways, bridges, parks, and other large investments such as land. 2509.3

IMPLEMENTATION

All capital budget requests should be reviewed and considered for their consistency with the recommendations of the Comprehensive Plan. At this point in time, the District government develops an annual capital improvements budget but the link to the Comprehensive Plan remains weak. This is a critical gap in the city's planning process that needs to be filled. The development of a multi-year CIP that is consistent with the Comprehensive Plan's policies, actions, and priorities will allow the city to make investments where they are needed most, and ensure a more logical allocation of funds. 2509.4

Policy IM-2.1.1: Capital Improvement Linkages

Link the city's Capital Improvement Program (CIP) to the Comprehensive Plan. Comprehensive Plan priorities should be more effectively embedded within the CIP to ensure that public dollars are spent as efficiently and effectively as possible. 2509.5

Action IM-2.1-A: DC Code Revisions

Revise the DC Code to formalize the link between the Comprehensive Plan and the multi-year Capital Improvements Plan. This link has been effective in other cities efforts to better tie capital expenditures to Comprehensive Plan recommendations and to increase the role and importance of the Comprehensive Plan. 2509.6

Action IM-2.1-B: Enhanced CIP Process

Develop an enhanced CIP process that:

- (a) Uses the Comprehensive Plan as the key guide to capital investments
- (b) Mandates a Public Facilities Master Plan – or, at least, an ongoing Master Public Facilities coordination program that assesses facility needs and coordinates the public improvement plans of multiple city agencies
- (c) Develops criteria for the review of capital projects for inclusion in the CIP that allows for an objective and transparent evaluation process
- (d) Includes an itemized allocation in the capital budget for implementation priorities that are specifically called for in the Comprehensive Plan
- (e) Clarifies the role of the Office of Planning in the CIP process
- (f) Ensures adequate staffing is in place and is available to support the CIP process
- (g) Develops and maintains a multi-year capital improvements planning process based on the Comprehensive Plan. 2509.7

IM- 2.2 Recommended Changes to the Zoning Regulations 2510

As noted in Section IM-1.3, the Zoning Regulations are a primary vehicle for implementing the Comprehensive Plan. The responsibility for zoning in the District of Columbia rests with the Zoning Commission. The Commission must give “great weight” to the recommendations of the Office of Planning on zoning cases, but has their own staff support (in the Office of Zoning). 2510.1

Actions for the Zoning Commission to consider during its planned update and revision of the zoning regulations are highlighted in Table 25-1. This list is a roll-up of all the actions contained in the Elements of this Comprehensive Plan, including recommended changes to zoning or items that need further study. Some of the text in the table has been shortened here – the full text can be found in the Elements of the Plan. Some of the recommended changes should be made in the short-term rather than waiting until the Zoning Regulations update. 2510.2

IM-3.0 Monitoring, Evaluating, and Amending the Comprehensive Plan 2511

This section describes how and when monitoring and evaluation of the Comprehensive Plan should occur and how regular reporting can foster more accountability and openness in the Comprehensive Planning process. It also makes recommendations on the process and schedule for updating and amending the Comprehensive Plan in the future. 2511.1

IM-3.1 Monitoring and Evaluating Comprehensive Plan Implementation 2512

The District of Columbia needs to be able to measure successes and challenges in Comprehensive Plan implementation. The Office of Planning shall prepare an overall implementation calendar for the Comprehensive Plan, scheduling individual items with planned startup points and planned completion. The implementation shall include the administrative staffing for ensuring that the various necessary actions across the District government are undertaken. The best way to measure progress would be a biennial (once every two years) Implementation progress report by the Office of Planning through the Mayor to the Council of the District of Columbia. This is a vital part of keeping the planning process open, transparent, and responsive. It can also be a vehicle for review and refinement of implementation priorities, deletion of completed actions, and the addition of new actions or policies. 2512.1

The Office of Planning should make the Comprehensive Plan progress report a highly publicized effort to demonstrate the important role the Comprehensive Plan plays in decisions that affect the change, growth and development of the city. This will also keep the Comprehensive Plan process a topic of public discourse. 2512.2

See also Action IM-1.4-A earlier in this Element on Progress Reports.

IM-3.2 Updating and Amending the Comprehensive Plan 2513

The 1984 Comprehensive Plan was amended only four times in 20 years. While the DC Code calls for the Comprehensive Plan to be amended “not less frequently than once every four years”, that target was not consistently achieved. In addition, when the amendment process did occur, it took years—even for small, incremental amendments. 2513.1

The existing four-year amendment cycle also does not contemplate periodic major revisions. A major revision is a more intensive effort than the amendment process, as whole sections of the Comprehensive Plan are re-written, based on the analysis of current data and challenges. In most cities, this process takes two or three years to complete. 2513.2

The 2003 Comprehensive Plan Assessment report concluded that the Comprehensive Plan amendment process took too long, did not include enough analysis of the need for (or impact of) individual amendments, and was not as transparent as was desired. The following recommendations respond to this conclusion and are organized into four categories:

- The timeline for the Comprehensive Plan amendment cycle.
- The process for submitting proposed amendments.
- The process for evaluating proposed amendments.
- The process for approving proposed amendments. 2513.3

IM- 3.2.1 The Amendment Timeline

It is recommended that the Comprehensive Plan be amended at least every four years and that a major revision/update of the Comprehensive Plan be completed every 12 years. The review of the practices of other major cities completed as part of the Comprehensive Plan Assessment suggests that a 10 to 15 year cycle for major revisions to the Comprehensive Plan is appropriate. The major revision would reassess all Comprehensive Plan policies, including citywide and area element policies. It would not necessarily include a total re-write of each Element but would focus instead on deleting outdated or irrelevant policies and actions, and editing or adding policies and actions to reflect emerging issues. The current provision that the Mayor can also submit amendments at other times should be retained. 2513.4

It is further recommended that the first amendment cycle be initiated in 2008, two years after this Comprehensive Plan is adopted. There are two reasons for this: 1) amendments may be necessary soon after the revision to address unanticipated issues associated with new language in the Comprehensive Plan, and 2) to make the amendment cycle fall appropriately between election cycles. Amendment cycles are thus recommended in 2008-2009 and then again four years later in 2012-2013 with a major update/revision envisioned in 2016-2018. 2513.5

Timeline for a Typical Amendment Cycle

It is recommended that amendments be sent by the Mayor to the City Council in May of the amendment year (2009, 2013, etc.), to avoid delays related to budget hearings that usually are completed by April. The details of the recommended timeline for the amendment process are as follows for 2008-2009 as an example: 2513.6

April-Aug 2008:	The Office of Planning conducts extensive public outreach to inform the public of the opportunity to submit amendments. At least one meeting in each Ward should take place to describe the amendment process, answer questions pertaining to the Comprehensive Plan or amendment submission and review process, encourage appropriately documented submissions, and ensure public participation in the amendment process. During this time period, the Office of Planning itself would consider proposed amendments to reflect emerging issues, new small area plans, outdated actions, map changes, etc.
Sept 15, 2008:	Deadline for submitting proposed amendments to the Office of Planning.
Sept-Nov 2008:	Initial screening of the proposed amendments by the Office of Planning to ascertain whether or not they are issues that can be addressed in the Comprehensive Plan. The Office of Planning would hold a public meeting to publicize what proposed amendments had been submitted.
Dec 2008-Feb 2009:	The Office of Planning coordinates the technical/policy analysis of the proposed amendments. The Office of Planning then prepares an "Amendment Report and Recommendations".
Mar-April 2009:	Mayor forwards recommendations to the Council.
May-Sept 2009:	Council holds public hearings in June and takes final action by September. If new amendments are proposed as a result of public hearings, these are forwarded to The Office of Planning for analysis during Council's summer recess.
Oct 2009:	After Council action, the Mayor may approve or veto the Council-approved Comprehensive Plan amendments.
Nov-Dec 2009:	After Mayoral approval, Congressional review (30 days) and NCPC review (60 days) run concurrently. If no changes are requested, then the amended Comprehensive Plan is formally adopted. 2513.7

IM-3.2.2 Amendment Submittal Process 2514

The Comprehensive Plan amendment process provides an opportunity for individuals, groups, city agencies, or the federal government to propose a change to the Comprehensive Plan to address changes in conditions and to reflect on-going work or new information. Proposed amendments can include changes to the text or maps of the Comprehensive Plan. 2514.1

Documenting the Reason and Rationale for Each Amendment

Demonstration that a change to the Comprehensive Plan is required lies solely with the applicant/proposer. The greater the degree of change proposed, the greater the burden of showing that the change is justified. Substantial reasons for amending the Comprehensive Plan include:

- (a) Significant changes have occurred since the adoption of the Comprehensive Plan that necessitate the proposed amendment
- (b) Inconsistencies in land use or other plan objectives and policies exist in the adopted Comprehensive Plan that affect a geographical area of the District.
- (c) The District government's ability to achieve the goals and objectives of the Comprehensive Plan will be increased, or the operations of District government will be enhanced, as a result of the proposed amendment.
- (d) Existing Comprehensive Plan goals, policies, or actions inhibit the ability of District government to achieve other public policy objectives.
- (e) Substantial improvement in the quality of life for District residents will be achieved.
- (f) Adoption of the proposed amendment is necessary to incorporate public policies established by the District government that are not reflected in the Comprehensive Plan.
- (g) The amendment is needed to ensure continued consistency with the Federal Elements. 2514.2

The following supporting information will be required when an amendment is proposed:

- (a) If applicable, the location/general area that would be affected by the proposed change.
- (b) A detailed description and explanation of the proposed text/map amendment, including the text and the specific language to be amended.
- (c) A description of how the issue is currently addressed in the Comprehensive Plan. If it is not addressed, the public need for it must be described.
- (d) An explanation of why the proposed change is the best means for meeting the identified public need, and what other options exist for meeting this need.
- (e) The anticipated impacts of the change, including the impacts on the geographic area affected and the issues presented. This should include an assessment of net benefits to the city resulting from the change.
- (f) Demonstration that the proposed change would be in conformance with the goals, policies and actions of the Comprehensive Plan. The applicant would be requested to include any data, research or reasoning that supports the proposed amendment.
- (g) Demonstration of public support for the proposed amendment (as illustrated, for example, by discussion of the proposal at a public meeting, such as an ANC meeting). 2514.3

IM-3.2.3 Analysis and Review Process 2515

The analysis and review process must provide the public with opportunities to review and discuss the proposed amendments prior to submission to Council. This process is outlined below. 2515.1

Initial Screen

The Office of Planning screens the proposed amendments. This first screen is a quick assessment to determine which proposed amendments are not proper subjects for inclusion in a Comprehensive Plan (such as operating, budget or legislative matters). The Office of Planning holds a public meeting to share its initial findings with the public. [If a Planning Commission were created, the Commission would hold a hearing to discuss the proposed amendments, including those that are determined to not be appropriate for the Comprehensive Plan.] The Office of Planning then conducts an analysis of those amendments determined to be appropriate. 2515.2

Technical/Policy Analysis

The Office of Planning analyzes the amendments and also coordinates the review of the proposed amendments with other District agencies. After collecting comments from other agencies, OP staff makes a recommendation that includes a detailed analysis. Staff then provides a “Proposed Amendments Report and Recommendations” and submits this report to the Mayor and the Council. [If a Planning Commission were created, then the Commission would hold a hearing and develop recommendations, which would then be sent to the Mayor and/or Council.] 2515.3

Proposed amendments would not be considered favorably if they were inconsistent with District law, more properly applicable to the Federal Elements than the District Elements of the Plan, included proposals that were beyond the legal scope or purview of the Comprehensive Plan, or submitted on a “marked up” or annotated copy of the Plan. Amendments to the Area Elements would be subject to the same criteria as amendments to the citywide elements. 2515.4

IM-3.2.4 Approval Process 2516

DC Council Review and Adoption

The following text outlines the steps in the Council review and adoption process for Comprehensive Plan amendments.

- (a) The Council Committee of the Whole (Committee) holds a public hearing to receive comments on proposed amendments submitted by the Mayor. Any new or significantly modified amendment proposals are sent to the Office of Planning to conduct technical analysis and formulate recommendations.
 - (b) Once recommendations are provided, the Committee holds a meeting to consider and vote on which amendments should be adopted (the Council Chairman develops an initial recommendation for the Committee to review).
 - (c) Following approval by the Committee of the Whole, Council considers and votes on an amendment package in at least two legislative meetings (first and second readings) no less than two weeks apart. Any new or significantly modified amendment that is generated during any of these readings would be required to be accompanied by planning analysis and recommendation prior to the Council taking final action on the amendment.
 - (d) If a new or significantly modified amendment substantially changes the form of the Comprehensive Plan legislation, the Council would then schedule another reading on the legislation at least two weeks later (this could mean that Council holds a third reading).
- 2516.1

Mayoral Approval

It is the Mayor’s responsibility to take action to approve or veto the amendments. 2516.2

Federal Review

The District-approved amendments are forwarded to Congress for a 30-day review period and to NCPC for a 60-day review period to assess the potential negative impacts of each amendment on the federal interest. If NCPC finds “no potential negative impacts on the federal interest” then the Comprehensive Plan amendments go into effect. If NCPC recommends changes to address negative impacts on the federal interest, then the Council must act to amend the plan to address NCPC requested changes. 2516.3

IM-3.3 Action Planning 2517

The section rolls-up all the actions included in the text of the Comprehensive Plan into an overall action plan (Table 25.1). The Action Plan includes:

- (a) The District agencies or other bodies that have the responsibilities for carrying out each Comprehensive Plan action (note: a list of agencies and abbreviations is included at the end of this Element);
- (b) The recommended implementation timeframe (see further explanation below); and
- (c) Those actions that will require capital funds for implementation. 2517.1

Priority actions are highlighted with the symbol **P**

Actions for the Zoning Commission to consider are highlighted with the symbol **Z**
2517.2

The recommended implementation timeframe classifies actions as follows:

- (a) on-going actions are continuous activities that should be occurring now and on a regular basis into the future
- (b) immediate actions are actions that are about to commence or that should be initiated during 2006 or 2007
- (c) “short-term” actions are actions that should be initiated by 2008 or 2009. Some short-term actions may take several years to complete
- (d) “mid-term” actions should be initiated by 2010 or 2011. Some mid-term actions may begin sooner than 2010, depending on funding and available staff resources
- (e) “long-term” actions include actions which may take many years to implement, and actions which may not begin until after 2010 due to funding and staff constraints or other factors 2517.3

It is recognized that when this Comprehensive Plan is adopted, there may not be complete agreement between the timeframes set here and the city’s approved Capital Improvement Program. Over time, a stronger link should be established so that the two documents are synchronized and eventually are in full agreement. Similarly, it should also be recognized that the actions listed below should not be interpreted as budgetary mandates. The intent is to convey a roster of priorities that should guide the Mayor and Council as they develop, approve, and execute annual operating and capital budgets. 2517.4

As noted on Page 25-1, Table 25.1 is a roll-up of all the actions contained in the Elements of this Comprehensive Plan. Some of the action text in the table has been shortened here – the full text of each action can be found in the Elements of the Comprehensive Plan.

Action	Responsible Agency(ies)	Timeframe	Capital Funds Needed (Y/N)
LAND USE			
STRENGTHENING THE CORE			
LU-1.1-A: Central Employment Area Boundary. Encourage NCPC to amend the boundary of the CEA depicted in the Federal Elements to match the boundary shown in the District Elements of the Comprehensive Plan. PRIORITY	OP, NCPC	Short-Term	N
LU-1.1-B: Downtown Action Agenda. Update the 2000 Downtown Action Agenda to reflect changing conditions, priorities, and projections. PRIORITY	OP, DBID	Immediate	N
LARGE SITES AND THE CITY FABRIC			
LU-1.2-A: Federal Land Transfer. Continue to work with the federal government to transfer federally-owned waterfront sites and other sites that have been traditionally used by the District to local control to capitalize more fully on unrealized waterfront development and parkland opportunities.	OP, NCPC, NPS, CC, EOM, OPM	On-going	N
TRANSIT-ORIENTED AND CORRIDOR DEVELOPMENT			
LU-1.3-A: Station Area and Corridor Planning. Conduct detailed station area and corridor plans prior to the application of TOD overlays in order to avoid potential conflicts between TOD and neighborhood conservation goals. These plans should be prepared collaboratively with WMATA and local communities and should include detailed surveys of parcel characteristics (including lot depths and widths), existing land uses, structures, street widths, the potential for buffering, and possible development impacts on surrounding areas. Plans should also address joint public-private development opportunities, urban design improvements, traffic and parking management strategies, integrated bus service and required service facilities, capital improvements, and recommended land use and zoning changes. PRIORITY	OP, DDOT, WMATA	Short-Term	N
LU-1.3-B: TOD Overlay Zone. During the forthcoming revision to the zoning regulations, create a TOD overlay district. The overlay should include provisions for mixed land uses, minimum and maximum densities (inclusive of density bonuses), parking maximums, and buffering and design standards that reflect the presence of transit facilities. Work with land owners, the DC Council, local ANCs, community organizations, WMATA, and the Zoning Commission to determine the stations where such a zone should be applied. The emphasis should be on stations that have the capacity to accommodate substantial increases in ridership and the potential to become pedestrian-oriented urban villages. Neighborhoods that meet these criteria and that would welcome a TOD overlay are the highest priority.	OP, OZ, ZC, CC	Short-Term	N

IMPLEMENTATION

A CITY OF NEIGHBORHOODS			
LU-2.1-A: Rowhouse Zoning District. Develop a new zoning district or divide the existing R-4 district into R-4-A and R-4-B to better recognize the unique nature of row house neighborhoods and conserves their architectural form (including height, mass, setbacks, and design). ZONING-RELATED	OP, OZ, ZC	Short-Term	N
LU-2.1-B: Amendment of Exterior Wall Definition. Amend the city's procedures for roof structure review so that the division-on-line wall or party wall of a row house or semi-detached house is treated as an exterior wall for the purposes of applying zoning regulations and height requirements. ZONING-RELATED	OP, OZ, DCRA	Short-Term	N
LU-2.1-C: Residential Rezoning. Provide a better match between zoning and existing land uses in the city's residential areas, with a particular focus on: blocks of well-established single family and semi-detached homes that are zoned R-3 or higher; blocks that consist primarily of row houses that are zoned R-5-B or higher; or historic districts where the zoning does not match the predominant contributing properties on the block face. In all three of these instances, pursue rezoning to appropriate densities to protect the predominant architectural character and scale of the neighborhood. PRIORITY, ZONING-RELATED	OP, OZ, ZC	Short-Term	N
LU-2.1-D: Avoiding "Mansionization." Consider adjustments to the District's zoning regulations to address the construction of excessively large homes that are out of context with the surrounding neighborhood ("mansionization"). ZONING-RELATED	OP, OZ, ZC	Short-Term	N
MAINTAINING COMMUNITY STANDARDS			
LU-2.2-A: Vacant Building Inventories. Maintain and continuously update data on vacant and abandoned buildings in the city, and regularly assess the potential for such buildings to support new uses and activities.	OP, DCRA	On-going	N
LU-2.2-B: Education and Outreach on Public Space Maintenance. Develop a public outreach campaign on the District's public space regulations (including the use of such space for announcements, campaign signs, and advertising), and resident/District responsibilities for maintenance of public space, including streets, planting strips, sidewalks, and front yards.	DPW, DDOT	Mid-Term	N

RESIDENTIAL LAND USE COMPATIBILITY			
LU-2.3-A: Zoning Changes to Reduce Land Use Conflicts in Residential Zones. As part of the comprehensive rewrite of the zoning regulations, develop text amendments which: expand buffering, screening, and landscaping requirements along the edges between residential and commercial and/or industrial zones; more effectively manage the non-residential uses that are permitted as a matter-of-right within commercial and residential zones in order to protect neighborhoods from new uses which generate external impacts; ensure that the height, density, and bulk requirements for commercial districts balance business needs with the need to protect the scale and character of adjacent residential neighborhoods; provide for ground-level retail while retaining the residential zoning along major corridors; ensure that there will not be a proliferation of transient accommodations in any one neighborhood. ZONING-RELATED	OP, OZ, DCRA, ZC	Mid-Term	N
LU-2.3-B: Analysis of Non-Conforming Uses. Complete an analysis of non-conforming commercial, industrial, and institutional uses in the District's residential areas. Use the findings to identify the need for appropriate actions, such as zoning text or map amendments and relocation assistance for problem uses. ZONING-RELATED	OZ, OP, DCRA, ANC	Mid-Term	N
NEIGHBORHOOD COMMERCIAL DISTRICTS AND CENTERS			
LU-2.4-A: Evaluation of Commercial Zoning. As part of each Small Area Plan, conduct an evaluation of commercially zoned areas to assess the appropriateness of existing zoning designations.	OP	On-going	N
LU-2.4-B: Zoning Changes to Reduce Land Use Conflicts in Commercial Zones. As part of the comprehensive rewrite of the zoning regulations, consider text amendments that: more effectively control the uses which are permitted as a matter-of-right in commercial zones; avoid the excessive concentration of particular uses with the potential for adverse effects, such as convenience stores, fast food establishments, and liquor-licensed establishments; and consider performance standards to reduce potential conflicts between incompatible uses. ZONING-RELATED	OP, OZ, ZC	Mid-Term	N
LU-2.4-C: Mixed Use District with Housing Emphasis. Develop a new mixed use zoning district, to be applied principally on land that is currently zoned for non-residential uses (or that is now unzoned), which limits commercial development to the ground floor of future uses and requires residential use on any upper stories. ZONING-RELATED	OZ, OP, ZC	Short-Term	N

IMPLEMENTATION

Action	Responsible Agency(ies)	Timeframe	Capital Funds Needed (Y/N)
PUBLIC WORKS AND INDUSTRIAL LAND USES			
LU-3.1-A: Industrial Zoning Use Changes. Provide a new zoning framework for industrial land, including: prohibiting high impact “heavy” industries in the C-M zones to reduce the possibility of land use conflicts; prohibiting certain civic uses that detract from the industrial character of C-M areas and that could ultimately interfere with business operations; Requiring special exceptions for potentially incompatible large retail uses in the C-M zone to provide more control over such uses without reducing height and bulk standards; limiting non-industrial uses in the M zone to avoid encroachment by uses which could impair existing industrial and public works activities; creating an IP (industrial park) district with use and bulk regulations that reflect prevailing activities; creating a Mixed Use district where residential, commercial, and lesser-impact PDR uses are permitted. Once these changes have been made, pursue the rezoning of selected sites in a manner consistent with the policies of the Comprehensive Plan. PRIORITY, ZONING-RELATED	OP, OZ, DMPED, ZC	Short-Term	N
LU-3.1-B: Industrial Land Use Compatibility.
